User Acceptance Testing (UAT) Template

Date	25 September 2026
Team ID	24bcs020@mscartsandscience-edu.in
Project Name	AI Fittrack
Maximum Marks	4 Marks

Project Overview:

Project Name: AI Fittrack

Project Description: AI-powered fitness and workout tracking application providing automated posture analysis, tailored workout plans, and real-time health metrics.

Project Version: v1.0.0

Testing Period: 20 September 2026 to 24 September 2026

Testing Scope:

- User Authentication & Profile Setup
- Real-time Camera-based Exercise Posture Detection
- AI Workout Recommendation & Tracking Module
- Dashboard Analytics & Daily Activity Summary

Testing Environment:

URL/Location: https://aifittrack-uat.internal-app.edu

Credentials (if required): tester_user / Pass123!

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Login & Authentication	1. Open app link 2. Enter credentials 3. Click Submit	User successfully logs in to dashboard.	Dashboard loaded smoothly.	**Pass**
TC-002	Camera Posture Tracking	1. Select Squat Workout 2. Enable Camera 3. Perform 5 reps	AI detects joint alignment and logs reps.	Reps detected with accurate posture feedback.	**Pass**
TC-003	AI Plan Generator	1. Input height/weight 2. Select goal 3. Generate plan	Customized 7-day workout plan generated.	Plan generated within 2 seconds.	**Pass**
TC-004	Workout Progress Logging	1. Finish workout 2. Tap Save Session	Data saved to DB and reflected on dashboard.	Delay in syncing calories burned metrics.	**Fail**

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Calorie calculation sync delay after completing workout session.	1. Complete TC-004 2. Save session 3. Check dashboard instantly	Medium	In Progress	Requires database indexing optimization.

Sign-off:

Tester Name: Alex Morgan (UAT Lead)

Date: 24 September 2026

_____

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
